PROFESSIONAL SUMMARY

Electronics and Communication Engineering undergraduate with strong skills in **Software Development, Back-end Engineering, Machine Learning, and Embedded Systems**. Proficient in **Python, Java, and C** with hands-on experience in **Django, Flask, React.js, REST API development, and database management**. Experienced in building **AI-powered applications, real-time computer vision systems, and full-stack web platforms**. Skilled in **Git, cloud technologies, and scalable system design**. Seeking opportunities as a **Software Developer / Backend Developer / AI Engineer** to develop **scalable, efficient, and intelligent software solutions**.

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering <i>Rajeev Gandhi Memorial College of Engineering and Technology, Nandyal</i>	2023 – 2027 CGPA: 8.5/10
Intermediate (MPC - Mathematics, Physics, Chemistry) <i>Government Junior College, Banaganapalli</i>	2022 – 2023 Percentage: 96%
SSC <i>ZP High(Boys) School, Banaganapalli</i>	2021 Percentage: 98%

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C
- **Backend Development:** Django, Flask, REST API Development
- **Frontend Technologies:** React.js, HTML5, CSS3, JavaScript
- **Databases:** MySQL, MongoDB
- **Tools and Platforms:** Git, GitHub, Arduino IDE, MATLAB (Basics)
- **Embedded Systems:** Microcontroller Programming, ESP32 Development, Hardware–Software Integration, Peripheral Interfacing
- **EDA & Simulation Tools:** Cadence, KiCad, LTspice

PROJECTS

- **Classroom Engagement System**
Technologies: Python, Django, HTML, CSS, MySQL
 - Developed a **web-based classroom interaction platform** enabling teachers to post questions and students to submit responses in real time.
 - Implemented **secure authentication and role-based access control** for teachers and students.
 - Designed backend services using **Django framework** to manage user interactions and database operations.
 - Optimized data handling using **MySQL database** to ensure efficient query processing.
- **Real-Time Object Detection System**
Technologies: Python, OpenCV, COCO Dataset, ESP32-CAM
 - Built a **computer vision system** capable of detecting and labeling objects in real time using OpenCV.
 - Implemented **multi-object detection** using COCO dataset class labels.
 - Integrated the object detection module with an **ESP32-CAM embedded platform** for real-time video processing.
 - Improved real-time inference performance through optimized image processing techniques.
- **AI-Based Personalized Learning Companion** Hackathon Project
Technologies: Python, Flask, JavaScript, Groq API, PyPDF2
 - Developed an **AI-powered learning assistant** that provides personalized study recommendations based on user input.
 - Implemented adaptive recommendation logic using **LLM-based AI models**.
 - Integrated **Groq API with LLaMA models** to generate intelligent responses.
 - Built an interactive web interface for **learning interaction and progress tracking**.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** — Amazon Web Services (2025)
- **Oracle Cloud Infrastructure Generative AI Professional** — Oracle
- **Web Development using Django** — APSSDC Summer Internship
- **Embedded System Developer Virtual Internship** — AICTE EduSkills & Microchip
- **NPTEL Certifications** — Soft Skills (2024), Computer Architecture and Organization (2025)

ACHIEVEMENTS

- Top 9 Finalist in a **National-Level Hackathon** among 97 competing teams by developing a full-stack web application.
- Runner-Up in **Circuit Debugging Competition**, demonstrating strong troubleshooting and hardware debugging skills.

ADDITIONAL ACTIVITIES

- Participated in **Smart India Hackathon (SIH)** and multiple national-level hackathons, building innovative technical solutions under time constraints.
- Presented technical topics in **college-level paper presentation events**, showcasing research and communication skills.
